There Goes the Neighborhood!
is a four day event that positions "the neighborhood" as a fluid institution of creative production, critical thinking and intersecting interests. Collaborations between artists, residents, small businesses, of workshops, talks, installations, performances and tours that center around the North Park neighborhood of San Diego, with satellite events at the UCSD campus and the San Diego Museum of Art (in conjunction with the opening night of the Summer Salon Series).
This year the focus of the There Goes the Neighborhood is "the neighborhood" as a nexus of global conditions which manifest themselves in local, everyday, situations. These issues range from transportation networks to means of food production to how information (and knowledge) is disseminated publicly.
There Goes the Neighborhood takes as its "fundamental organizing assumption the notion that individuals are inherently active, thoughtful, innovative and engaged citizens." So please join us in examining these issues.
The project is not complete without your participation!
